

# Convert an Image to a PDF file on iPhone

1. Go to your photos and **select** which **image(s)** you want to convert to a PDF. NOTE: You can select multiple images to save into one PDF file.
2. Once you selected your image(s), **select** the **Share icon** at the bottom of the screen. 
3. Scroll down to the menu until you see Print, **select Print**.

4. In the **Printer Options** screen, on the image itself, do the **Pinch Out Gesture** and a PDF will be created immediately.

5. In the top right-hand corner **select the Share icon** and scroll down the menu until you see Save to Files, **select Save to Files.**

6. **Select where** you want your PDF file to be saved and **select the Save icon** in the top right-hand corner.

7. To find your PDF, go to the **Files Application** on your iPhone and then to the location you saved the PDF file. If you do not know how to find the Files Application, **swipe left on your home screen** until you get the search bar. In the **search bar, type in Files App** and you should see an icon like this; select that icon.
